

Project: Wellesley Hotel - Knightsbridge

Client: Arab Investments

Sector: Hospitality

Duration: 24 Months

The new build project in Knightsbridge was to create a 5 star boutique hotel for the very highest end clients

NM Cabling carried out the overall communications project team role co-ordinating all the hardware into the building during design stage, construction and fit out

NM Cabling was also responsible for the installation of all the Data Cabling, Audio Visual Installation, WIFI Installation and Communications room installation and patching

The data cabling infrastructure was installed under the project lead by Brookfield Multiplex and Mercury Engineering

The infrastructure project was a year in completion and on a tight time frame and working environment due to the location of the building and its access

Each bedrooms was fitted with large screen LED Televisions in the living rooms, bedroom and bathrooms.

Each room had a smart link to each TV to allow the guest to link their IPOD, Laptop or mobile device directly to the Televisions

IPTV was installed throughout for the latest movies, music and TV shows

NM cabling installed the Satellite systems and Hardware to distribute these services as well as the control systems in each room

Throughout the ground floor zoned music was installed to allow each zone its own music source and volume

There was also a stage sound system installed in the Hotel Jazz Bar for West End stage productions
